

Marc Berthelette

Senior DevOps Engineer · Observability · AI-Assisted Engineering

Smiths Falls, ON, Canada · Remote · marc.berthelette@gmail.com

linkedin.com/in/marc-berthelette-3aba6917 · Bilingual: French (native) · English (fluent) · Incorporated in Canada · Available immediately

Professional Summary

Senior DevOps engineer with deep observability practice (Dynatrace, Splunk, ELK Stack) and current, disciplined AI-assisted engineering experience — scoped tool use with human-validation checkpoints before any AI-generated code reaches production. Takes ownership of production systems other people are hesitant to touch, learning them cold under a delivery deadline. Regulated-sector experience in energy and financial services; fully bilingual French/English.

Core Expertise

Observability	Dynatrace, Splunk, ELK Stack (Elasticsearch, Logstash, Kibana)
AI-Assisted Engineering	Scoped/gated AI-assisted development, human-validation checkpoints, risk assessment of generated-code promotion
Platform Engineering & Enablement	CI/CD standardization across heterogeneous stacks, pipeline-as-code, cross-team enablement without reporting authority
Infrastructure & Cloud Automation	Microsoft Azure, Terraform, Ansible, Kubernetes, Docker, ArgoCD
Reliability & Production Engineering	Root cause analysis, MTTR reduction, incident response, automated remediation
Programming & Systems	Python, FastAPI, Bash, C++, Java, SQL, NoSQL, Red Hat Linux

Work Experience

Desjardins — Senior DevOps Engineer (*Contract*)

Montréal, QC (Remote) | October 2025 – March 2026 — *concurrent engagement, delivered alongside the Énergir role*

- Designed and built a Python/FastAPI health-monitoring service that automatically tested the configuration of ~250 remote Artifactory repositories every 4 hours, publishing results to Dynatrace with technology-segmented dashboards providing real-time visibility into repository health.
- Built Splunk alerting to detect manual configuration changes made outside the CI/CD pipeline, improving auditability and compliance.
- Automated provisioning of on-demand Artifactory instances using Kubernetes and ArgoCD.

Key technologies: JFrog Artifactory, Dynatrace, Splunk, Python, FastAPI, Kubernetes, ArgoCD, GitHub Actions

Énergir — Senior DevOps Engineer

Montréal, QC | September 2021 – Present

- Introduced AI-assisted engineering practices over the past 6–9 months with researched scope gates and human-validation checkpoints before any AI-generated code ships — and flagged to leadership that the organization has no equivalent safeguards.
- Owned CI/CD standardization for 12 application teams and 70+ applications across nine distinct runtimes.
- Drove root cause analysis on critical production incidents and built proactive monitoring and automated remediation that reduced MTTR across the application estate.
- Led cloud modernization migrating 5–10 mission-critical services to Microsoft Azure with Terraform/Ansible IaC.

Key technologies: Microsoft Azure, Terraform, Ansible, Azure DevOps, GitHub Actions, Python

Tink — DevOps Engineer

Montréal, QC | January 2018 – August 2021

- Built centralized log aggregation using the ELK Stack, enabling proactive detection of production anomalies and reducing incident response times.

- Drove down 24/7 on-call frequency via RCA and prevention; built a self-healing response for an unstable Elasticsearch cluster.
- Centralized Jenkins Pipeline as Code across a team of 10–15 developers maintaining 80+ applications for 20+ clients.

Key technologies: ELK Stack, Jenkins, Bash, Linux, Puppet, AWS (EC2, S3, Route 53, VPC)

SOVO Technologies — Lead Technician → Software Engineer

Montréal, QC | November 2008 – December 2017

- Owned all company IT infrastructure, including a zero-downtime server relocation and a redundant architecture eliminating single points of failure.
- Wrote production software alongside infrastructure work for roughly seven years before the title formalized it.

Key technologies: C++, Java, SQL, Windows Server, Linux, Active Directory, VMware vSphere

Education

Bachelor of Automated Manufacturing Engineering — École de Technologie Supérieure (ÉTS), Montréal, QC | 2005 – 2016

DCS in Computer Science Technology — Cégep André-Laurendeau, Montréal, QC | 2002 – 2005
