Professional Summary

Senior DevOps engineer with deep Microsoft Azure practice, including cloud modernization and system-to-system data integration work — orchestrating Salesforce and enterprise Data Lake platforms to enable secure, automated data pipelines at Énergir. Takes ownership of production systems other people are hesitant to touch, learning unfamiliar tools cold under a delivery deadline.

Core Expertise

Infrastructure & Cloud Automation	Microsoft Azure, Terraform, Ansible, Kubernetes, Docker, ArgoCD
CI/CD & Artifact Management	Azure DevOps, GitHub Actions, Jenkins, JFrog Artifactory
Platform Engineering & Enablement	CI/CD standardization, pipeline-as-code, cross-team enablement
Reliability & Production Engineering	Root cause analysis, MTTR reduction, incident response, automated remediation
Programming & Systems	Python, FastAPI, Bash, C++, Java, SQL, NoSQL, Red Hat Linux

Work Experience

Énergir — Senior DevOps Engineer

Montréal, QC | September 2021 – Present

- Led cloud modernization migrating 5–10 mission-critical services to Microsoft Azure, implementing Terraform and Ansible IaC practices that standardized environment provisioning and eliminated configuration drift.
- Orchestrated integration between Salesforce and enterprise Data Lake platforms, enabling secure, automated data pipelines and supporting data-driven decision-making at scale.
- Owned CI/CD standardization for 12 application teams and 70+ applications across nine distinct runtimes.
- Rebuilt Salesforce delivery with no prior Salesforce experience, replacing legacy ANT scripts with the official Salesforce CLI and a validation pipeline testing every candidate merge.

Key technologies: Microsoft Azure, Azure DevOps, GitHub Actions, Terraform, Ansible, Salesforce, Data Lake, Python

Desjardins — Senior DevOps Engineer (*Contract*)

Montréal, QC (Remote) | October 2025 – March 2026 — *concurrent engagement, delivered alongside the Énergir role*

- Designed and built a Python/FastAPI service that automatically tested the configuration of ~250 remote Artifactory repositories every 4 hours, publishing results to Dynatrace via automated API-driven workflows.
- Automated provisioning of on-demand Artifactory instances using Kubernetes and ArgoCD.

Key technologies: JFrog Artifactory, Python, FastAPI, Kubernetes, ArgoCD, Dynatrace, Docker

Tink — DevOps Engineer

Montréal, QC | January 2018 – August 2021

- Built the compute, caching, and database layers of a client's AWS migration target environment — EC2, S3, Route 53, VPC — with no prior AWS experience; the client cancelled before cutover.
- Centralized Jenkins Pipeline as Code across a team of 10–15 developers maintaining 80+ applications for 20+ clients.

Key technologies: AWS (EC2, S3, Route 53, VPC), Jenkins, ELK Stack, Bash, Linux, Puppet

SOVO Technologies — Lead Technician → Software Engineer

Montréal, QC | November 2008 – December 2017

- Owned all company IT infrastructure, including a zero-downtime server relocation and a redundant architecture eliminating single points of failure.
- Wrote production software alongside infrastructure work for roughly seven years before the title formalized it.

Key technologies: C++, Java, SQL, Windows Server, Linux, Active Directory, VMware vSphere

Education

Bachelor of Automated Manufacturing Engineering — École de Technologie Supérieure (ÉTS), Montréal, QC | 2005 – 2016

DCS in Computer Science Technology — Cégep André-Laurendeau, Montréal, QC | 2002 – 2005
