Professional Summary

Senior DevOps/SRE engineer who takes ownership of production systems other people are hesitant to touch — driving root-cause analysis, automated remediation, and reliability improvements across a large application estate. Introduced disciplined, scoped AI-assisted engineering practices into daily production work, with hard scope gates and human-validation checkpoints before any AI-generated code ships. Deep Terraform, Ansible, and Kubernetes-based automation practice in regulated sectors (energy, financial services).

Core Expertise

Reliability & Production Engineering	Root cause analysis, MTTR reduction, proactive monitoring & alerting, incident response, automated remediation, 24/7 on-call
AI-Assisted Engineering	Scoped/gated AI-assisted development, human-validation checkpoints, risk assessment of generated-code promotion
Infrastructure & Cloud Automation	Microsoft Azure, AWS, Terraform, Ansible, Kubernetes, Docker, ArgoCD
CI/CD & Artifact Management	Azure DevOps, GitHub Actions, Jenkins, JFrog Artifactory
Observability	Dynatrace, Splunk, ELK Stack (Elasticsearch, Logstash, Kibana)
Programming & Systems	Python, FastAPI, Bash, C++, Java, SQL, NoSQL, Red Hat Linux

Work Experience

Énergir — Senior DevOps Engineer

Montréal, QC | September 2021 – Present

- Drove root cause analysis on critical production incidents and built the proactive monitoring, dashboards, and automated remediation that reduced Mean Time to Recovery (MTTR) across the application estate.
- Introduced AI-assisted engineering practices over the past 6–9 months with researched scope gates and human-validation checkpoints before any AI-generated code ships — and flagged to leadership that the organization has no equivalent safeguards.
- Owned CI/CD standardization for 12 application teams and 70+ applications across nine distinct runtimes.
- Led cloud modernization migrating 5–10 mission-critical services to Microsoft Azure with Terraform/Ansible IaC.

Key technologies: Microsoft Azure, Terraform, Ansible, Azure DevOps, GitHub Actions, Python

Desjardins — Senior DevOps Engineer (Contract)

Montréal, QC (Remote) | October 2025 – March 2026 — *concurrent engagement, delivered alongside the Énergir role*

- Designed and built a Python/FastAPI health-monitoring service that automatically tested the configuration of ~250 remote Artifactory repositories every 4 hours, publishing results to Dynatrace with technology-segmented dashboards providing real-time visibility.
- Automated provisioning of on-demand Artifactory instances using Kubernetes and ArgoCD, enabling safe testing of configuration changes.
- Extended the engagement past its original scope by making the validation logic tool-agnostic and configurable; the same harness later de-risked the platform's own version upgrade.

Key technologies: JFrog Artifactory, Python, FastAPI, Kubernetes, ArgoCD, Dynatrace, GitHub Actions, Docker

Tink — DevOps Engineer

Montréal, QC | January 2018 – August 2021

- Drove down 24/7 on-call frequency via RCA and prevention — from roughly one page every 2 rotations to one every 4–5 by the end; built a self-healing response for an unstable Elasticsearch cluster.

- Built the compute, caching, and database layers of a client's AWS migration target environment — EC2, S3, Route 53, VPC — with no prior AWS experience; the client cancelled before cutover.
- Automated OS-level patching across 600+ servers, fleet configuration driven declaratively through Puppet and Spacewalk.

Key technologies: AWS (EC2, S3, Route 53, VPC), Jenkins, ELK Stack, Bash, Linux, Puppet

SOVO Technologies — Lead Technician → Software Engineer

Montréal, QC | November 2008 – December 2017

- Owned all company IT infrastructure, including a zero-downtime server relocation and a redundant architecture eliminating single points of failure.
- Wrote production software alongside infrastructure work for roughly seven years before the title formalized it.

Key technologies: C++, Java, SQL, Windows Server, Linux, Active Directory, VMware vSphere

Education

Bachelor of Automated Manufacturing Engineering — École de Technologie Supérieure (ÉTS), Montréal, QC | 2005 – 2016

DCS in Computer Science Technology — Cégep André-Laurendeau, Montréal, QC | 2002 – 2005
