Hello,

I am applying for the Senior Azure Cloud DevOps Specialist contract (RQ01840). Azure has been my main platform for the past five years, and the centre of the role, enterprise CI/CD, Azure deployments and Python automation, is the work I have been doing.

At Énergir I initiated shared Jenkins pipelines used by every team already deploying through Jenkins, in an environment of about 50 developers, 12 teams and 70+ applications, with mandatory SonarQube checks that teams could not bypass. I automated routine Oracle releases, replaced a 15-step MuleSoft checklist with version-based deployments of QA-tested artifacts, and rebuilt Salesforce delivery on the official CLI with validation before merge. I also helped a team move its Nexus, Jenkins and Vault environments from manual Azure portal operations to infrastructure as code, and later introduced Azure Key Vault in place of HashiCorp Vault.

At Desjardins I built a Python/FastAPI workflow that provisioned Artifactory, tested uncached retrieval across about 250 repositories on a schedule, and published results to Dynatrace through ArgoCD. I have supported production on-call and diagnosed build, deployment and live issues throughout my career.

To be direct about the gaps: my pipelines have been Jenkins, Azure DevOps and GitHub Actions rather than GitLab, so GitLab CI would be new tooling. My Kubernetes experience is deploying applications to clusters other teams operate, and I have not run OpenShift. My Terraform and Ansible work was inside another team's workflows, not modules I authored. I hold no Azure or Kubernetes certifications. I pick up new pipeline tooling quickly because the underlying delivery problems are the same.

I am bilingual in French and English, incorporated in Canada, available immediately, and comfortable with three days a week on site in Ottawa. I understand the role requires Secret, CGP or Trade Controlled clearance, and I would appreciate learning what the client needs from me to start that process. Could you also confirm the position is still open? My resume is attached.

Thank you for your consideration.

Marc Berthelette
