Marc Berthelette

Senior DevOps Engineer — Cloud Infrastructure and Developer Platforms

Smiths Falls, ON, Canada · Remote · marc.berthelette@gmail.com
marcberthelette.com · LinkedIn
Bilingual: French / English · Incorporated in Canada · Available immediately

Professional Summary

Senior DevOps engineer with nearly 18 years across infrastructure, software development and operations. Built shared delivery pipelines for 12 teams and 70+ applications at Énergir, ran enablement sessions to drive adoption, and helped move team-owned Azure environments to Infrastructure as Code using another team's Terraform and Ansible workflows. Built a Python/FastAPI validation service at Desjardins that reports to Dynatrace. Kubernetes experience is as an application and platform user, not an AKS operator.

Technical Skills

Cloud & Infrastructure: Azure (resource groups, networking, VMs, Storage accounts, Key Vault), Terraform/Ansible workflows (user of another team's modules), AWS migration environment, Linux
CI/CD & Platforms: Jenkins (shared pipeline standards), GitHub Actions, Azure DevOps, SonarQube, JFrog Artifactory
Containers & Observability: Docker, Kubernetes application deployments, ArgoCD, Dynatrace, Splunk, ELK
Programming: Python, FastAPI, Bash, Java, C++, SQL

Work Experience

Énergir — Senior DevOps Engineer (Contract)

Montréal, QC | September 2021 – September 2026
Five-year consulting engagement, renewed four times.

- Helped a team move team-owned Nexus, Jenkins controllers and agents, and HashiCorp Vault from manual Azure portal operations to Infrastructure as Code, using another team's Terraform (resource groups, networking, VMs) and Ansible (host and Docker configuration) workflows; later introduced Azure Storage accounts for Terraform state and Azure Key Vault in place of HashiCorp Vault.
- Initiated shared Jenkins pipelines adopted by all teams already deploying through Jenkins, in an environment of about 50 developers, 12 teams and 70+ applications; achieved approximately 80–90% JaCoCo coverage of shared pipeline code with per-commit unit tests and built sample applications for integration testing.
- Enforced shared stages and mandatory SonarQube checks in the shared pipelines so developers could not simply skip them.
- Ran recurring enablement sessions (about six per year) with each application team after pipeline delivery; onboarded new DevOps engineers and developers and was the primary developer contact when the delivery ecosystem broke.
- Separated application-code errors from platform-pipeline errors in build reporting so teams could see whose fix a failure was.
- Migrated production Salesforce logs to direct Dynatrace ingestion; expanded error parsing and dashboards to help the team investigate previously hidden issues.
- Introduced AI-assisted engineering practices with hard scope gates and human-validation checkpoints before any AI-generated code reaches production.
- Replaced a 15-step MuleSoft checklist with version-based deployments of QA-tested artifacts, moving release preparation ahead of production windows and simplifying rollback.

Key technologies: Jenkins, SonarQube, Azure, Python, JaCoCo, Salesforce CLI, Oracle, Node.js, MuleSoft, Dynatrace

Desjardins — Senior DevOps Engineer (Contract)

Montréal, QC (Remote) | October 2025 – March 2026
Concurrent with the Énergir engagement.

- Built a Python/FastAPI workflow that provisioned Artifactory, applied configuration from a selected Git reference, and tested uncached artifact retrieval across approximately 250 repositories.

- Deployed the suite through ArgoCD/GitOps for scheduled execution, publishing configuration-version and artifact-level results to Dynatrace to expose configuration and upstream connectivity failures.
- Made most validation logic tool-agnostic and the artifact test set configurable so platform administrators could add their own cases.
- Implemented artifact retention policies and Splunk alerts for configuration changes made outside CI/CD.

Key technologies: Python, FastAPI, Artifactory, Kubernetes, ArgoCD, Dynatrace, Splunk

Tink — DevOps Engineer

Montréal, QC | January 2018 – August 2021

- Standardized Jenkins pipelines for 10–15 developers supporting 80+ applications and 20+ clients, integrating release details and Jira references into deployment reporting.
- Replaced reactive patching across 600+ servers with staged Spacewalk schedules, environment/role groups, A/B frontend and middleware batches, and dependency-aware reboots.
- Built fleet inventory across Unix and Windows servers to identify vulnerable applications and upcoming end-of-life upgrades; added TLS scoring and environment version tracking for Ops, product owners, and QA.
- Automated PRTG-triggered response to Elasticsearch CPU saturation: attempted a process restart after two minutes and alerted on-call at five minutes if saturation persisted; supported a 24/7 rotation.
- Built an AWS migration target using console provisioning (EC2, S3, Route 53, VPC, caching and database services); the client cancelled before production cutover.

Key technologies: Linux, Jenkins, Puppet, Spacewalk, PRTG, ELK, AWS, Rocket.Chat

SOVO Technologies — Lead Technician → Software Engineer

Montréal, QC | November 2008 – December 2017

- Led and performed most redundancy work across HAProxy, authentication, speech-recognition servers and file services with a second technician; supported live-captioning requirements of three minutes maximum downtime per broadcast and eight-second caption latency.
- Owned IT planning and execution for two office relocations involving approximately 15–20 workstations, preparing networks and cabling and coordinating phased moves to minimize disruption.
- Developed production scheduling, speech-recognition evaluation, and multilingual dictionary software; served as the final quality gate before production releases.

Key technologies: HAProxy, Active Directory, VMware vSphere, Linux, Windows Server, C++, Java, SQL

Education

Bachelor of Automated Manufacturing Engineering — École de Technologie Supérieure (ÉTS), Montréal | 2016

DCS in Computer Science Technology — Cégep André-Laurendeau, Montréal | 2005
