EPAM Systems — Hiring Team

Re: Lead Cloud Engineer, Unified Automation Platform (Azure/AKS)

Hello,

I am applying for the Lead Cloud Engineer role. Azure has been my main platform for five years, and the role's mix of Terraform, Ansible, Azure DevOps pipelines, Key Vault and identity wiring overlaps directly with work I have done.

At Énergir I helped a team move its own Nexus, Jenkins and Vault environments from manual Azure portal operations to infrastructure as code. Terraform provisioned the resource groups, networking and VMs, and Ansible configured the hosts and Docker. I later introduced Azure Storage accounts for Terraform state and Azure Key Vault in place of HashiCorp Vault. I also centralized Jenkins CI/CD for about 50 developers across 12 teams and more than 70 applications, and I was the informal owner of the delivery roadmap, onboarding developers and DevOps engineers and acting as their primary support contact.

At Desjardins I built a Python/FastAPI service that tested about 250 Artifactory repositories every four hours and published results to Dynatrace, and I used Kubernetes and ArgoCD to build on-demand test environments.

To be direct about the gaps, because they are central to this role: my Terraform and Ansible work was inside another team's workflows, and I proposed improvements rather than authoring the modules. I have deployed applications to Kubernetes clusters that other teams operate, but I have not run AKS in production, including node pools, policy, ingress or tenant onboarding. I have not built image-factory pipelines, worked with OpenBao, or worked with Backstage or Azure VMware Solution. My Azure networking work has been practical rather than as a specialist. My leadership has been informal, without direct reports.

I am based in Ontario, bilingual in French and English, incorporated in Canada and available immediately. Could you confirm whether this is a contract or employee role, the expected working hours and time zone, and the pay range? My resume is attached.

Thank you for your consideration.
