Jobgether — Hiring Team (on behalf of a partner company)

Re: Azure Cloud Engineer (100% remote, Canada)

Hello,

I am applying for the Azure Cloud Engineer role. Azure is the platform I have worked on most over the past five years, and the role's mix of infrastructure as code, GitHub-based pipelines, observability and incident response matches the work I have been doing.

At Énergir I helped a team move its own Nexus, Jenkins and Vault environments from manual Azure portal operations to infrastructure as code. Terraform provisioned the resource groups, networking and VMs, and Ansible configured the hosts and Docker. I later introduced Azure Storage accounts for Terraform state and Azure Key Vault in place of HashiCorp Vault. To be precise about my role, I worked inside Terraform and Ansible workflows owned by another team and proposed improvements to them. I have not authored the modules myself, and I would rather say so now than have it surface in an interview.

The part I am strongest at is delivery. I standardized CI/CD for about 50 developers across 12 teams and more than 70 applications, with shared pipeline stages and mandatory quality gates developers could not skip. I separated application failures from platform failures in pipeline reporting so each team could see at a glance whether a result was theirs to fix. On the reliability side, I led root-cause analysis on production incidents and built monitoring, dashboards and automated remediation. At Desjardins I built a Python/FastAPI service that tested about 250 repositories every four hours and published the results to Dynatrace, with Splunk alerting on changes made outside the pipeline.

I have not run Azure Container Apps or Azure PostgreSQL in production, and I have not set formal SLOs for a service. In previous roles I learned unfamiliar platforms quickly by working out how they actually behave before automating them, and I would expect to do the same here.

I am based in Ontario, bilingual in French and English, incorporated in Canada and available immediately. My resume is attached.

Thank you for your consideration.
