Procom — Hiring Team (on behalf of a client)

Re: Senior Azure Cloud DevOps Specialist (RQ01840), Ottawa hybrid

Hello,

I am applying for the Senior Azure Cloud DevOps Specialist contract. Azure has been my main platform for the past five years, and the role's centre of gravity, enterprise CI/CD, Azure deployments and Python automation, is the work I have been doing.

At Énergir I centralized Jenkins CI/CD for about 50 developers across 12 teams and more than 70 applications, with shared stages and mandatory SonarQube checks that teams could not bypass. I automated Oracle, Salesforce and MuleSoft releases, and replaced deployments from developers' laptops with service-account deployments to dev, test and production. I also helped a team move its Nexus, Jenkins and Vault environments from manual Azure portal operations to infrastructure as code, and later introduced Azure Key Vault in place of HashiCorp Vault.

At Desjardins I built a Python/FastAPI service that tested about 250 Artifactory repositories every four hours and published results to Dynatrace, and automated on-demand test environments with Kubernetes and ArgoCD. I have supported production on-call and diagnosed build, deployment and live issues throughout my career.

To be direct about the gaps: my pipelines have been Jenkins, Azure DevOps and GitHub Actions rather than GitLab, so GitLab CI would be new tooling for me. My Kubernetes experience is deploying applications to clusters other teams operate, and I have not run OpenShift. My Terraform and Ansible work was inside another team's workflows, not authoring modules. I have no Azure or Kubernetes certifications. I pick up new pipeline tooling quickly because the underlying delivery problems are the same.

I am bilingual in French and English, incorporated in Canada, available immediately, and comfortable with three days a week on site in Ottawa. I understand the role requires Secret, CGP or Trade Controlled clearance, and I would appreciate learning what the client needs from me to start that process. My resume is attached.

Thank you for your consideration.
