Wind River — Hiring Team

Re: Senior DevOps Engineer, Wind River Cloud (Kanata, ON), J000698881

Hello,

I am applying for the Senior DevOps Engineer role on the Wind River Cloud team. The part of the posting that matches my work most closely is improving build reliability, failure analysis and release readiness, and building automation that removes manual effort from the pipeline.

At Énergir I centralized Jenkins CI/CD for about 50 developers across 12 teams and more than 70 applications, with shared stages and mandatory quality gates. I separated application-code failures from platform-pipeline failures in build reporting, which cut false-positive failures and made it clear who owned each fix. I automated releases that had been manual, including cutting a 15-step MuleSoft checklist to a few Jenkins jobs and adding tests that caught recurring file-encoding failures before release. I was the primary developer contact for delivery failures and onboarded new engineers.

At Desjardins I wrote a Python/FastAPI service that tested about 250 Artifactory repositories every four hours and published the results to Dynatrace, and I automated on-demand test environments with Kubernetes and ArgoCD. Earlier, I came to DevOps from software development in C++ and Java, and at Tink I automated patching of 600+ Linux servers with Puppet.

To be direct about the gaps: I have not used Gerrit, Zuul or GitLab CI, and I have not worked with OpenStack or StarlingX or contributed to open-source projects. My Kubernetes experience is deploying applications to clusters that other teams operate, so I would not be an expert in the platform internals your team builds. My Terraform and Ansible work was within another team's workflows. I have used Bitbucket for about eight years and Jenkins extensively. I learn unfamiliar toolchains by reading how they behave before automating them.

I am in Ontario, bilingual in French and English, and available immediately. Please let me know the expected number of office days in Kanata. My resume is attached.

Thank you for your consideration.

Marc Berthelette
