

# Marc Berthelette

## Senior Site Reliability Engineer | Azure Platform Engineering | Reliability Automation

Smiths Falls, ON, Canada | Ottawa hybrid | marc.berthelette@gmail.com

linkedin.com/in/marc-berthelette-3aba6917 | Bilingual: French (native), English (fluent) | Available immediately

### Professional Summary

Senior reliability and platform engineer with 18 years of experience turning unfamiliar production systems into dependable, observable, and automated platforms. Standardized CI/CD for 12 teams and 70+ applications at Energir, built an extensible Python/FastAPI health and validation service for approximately 250 enterprise Artifactory repositories at Desjardins, and automated operations across a 600-server fleet at Tink. Deep Microsoft Azure, Terraform, Ansible, CI/CD, observability, incident response, and developer-enablement experience, with hands-on Kubernetes, ArgoCD, Docker, and Helm delivery. Known for reducing operational toil, fixing root causes, and building reusable self-service capabilities.

### Core Expertise

|                                            |                                                                                                       |
|--------------------------------------------|-------------------------------------------------------------------------------------------------------|
| <b>Site Reliability Engineering</b>        | Incident response, root-cause analysis, MTTR reduction, alert quality, automated remediation, on-call |
| <b>Azure and Infrastructure Automation</b> | Microsoft Azure, Terraform, Ansible, Kubernetes, Docker, ArgoCD, Helm                                 |
| <b>CI/CD and Developer Enablement</b>      | Azure DevOps, GitHub Actions, Jenkins, pipeline-as-code, self-service patterns, cross-team training   |
| <b>Observability</b>                       | Dynatrace, Splunk, ELK Stack, health signals, dashboards, logging, monitoring and alerting            |
| <b>Programming and Systems</b>             | Python, FastAPI, Bash, Java, Linux, distributed application operations                                |

### Work Experience

#### Energir - Senior DevOps Engineer

Montreal, QC | September 2021 - Present

- Standardized CI/CD across nine runtimes and more than 70 applications for 12 teams, replacing fragile manual delivery with reusable pipelines and built-in quality gates.
- Led modernization of 5-10 mission-critical services on Microsoft Azure and used Terraform and Ansible to standardize dev, staging, and production environments.
- Drove root-cause analysis on critical incidents and built monitoring, dashboards, and automated remediation that reduced Mean Time to Recovery across the application estate.
- Made pipeline failures self-diagnosing by separating application-code errors from platform errors, reducing false-positive escalations and helping teams resolve failures faster.
- Led platform adoption without reporting authority through recurring enablement sessions and knowledge transfer for all 12 application teams.
- Partnered with Enterprise Architecture on resilient, cost-conscious cloud infrastructure and evaluated emerging technologies through proofs of concept.

**Key technologies:** Microsoft Azure, Azure DevOps, GitHub Actions, Terraform, Ansible, Python, Java, Docker, Databricks, CloudFoundry

#### Desjardins - Senior DevOps Engineer (Contract)

Montreal, QC (Remote) | October 2025 - March 2026 - concurrent engagement delivered alongside the Energir role

- Built a Python/FastAPI service that validated approximately 250 enterprise JFrog Artifactory repositories every four hours and published continuous health signals to Dynatrace.
- Designed the validation engine to be tool-agnostic and configurable, enabling administrator self-service and turning it into the regression-safety net for an enterprise JFrog upgrade.
- Automated on-demand Artifactory environment provisioning with Kubernetes and ArgoCD for safe, repeatable testing.

- Added Splunk alerting for configuration changes made outside the delivery pipeline and implemented artifact lifecycle controls.

**Key technologies:** Python, FastAPI, JFrog Artifactory, Kubernetes, ArgoCD, GitHub Actions, Dynatrace, Splunk, Docker, Helm

## **Tink - DevOps Engineer**

**Montreal, QC | January 2018 - August 2021**

- Centralized Jenkins Pipeline as Code across 80+ applications for 20+ clients, standardizing delivery across heterogeneous technology stacks.
- Automated patching and kernel-update reboots across 600+ servers using Puppet and Spacewalk, reducing the process to a monthly verification check with near-zero downtime.
- Reduced on-call frequency from roughly one page every two rotations to one every four or five through root-cause analysis, prevention, and self-healing automation.
- Built centralized ELK logging and a fleet-wide internal product exposing CVE, end-of-life software, and SSL/TLS certificate risks to product owners.

**Key technologies:** Jenkins, Puppet, Python, Bash, Linux, ELK Stack, PRTG, Spacewalk, AWS

## **SOVO Technologies - Lead Technician to Software Engineer**

**Montreal, QC | November 2008 - December 2017**

- Owned company infrastructure and implemented a redundant architecture that eliminated single points of failure, including a zero-downtime server relocation.
- Wrote production software for approximately seven years, including a production scheduling system and multilingual voice-recognition evaluation tooling.

**Key technologies:** C++, Java, SQL, Linux, Windows Server, VMware vSphere, networking, backup and recovery

## **Education**

**Bachelor of Automated Manufacturing Engineering** - Ecole de Technologie Superieure (ETS), Montreal, QC | 2005 - 2016

**DCS in Computer Science Technology** - Cegep Andre-Laurendeau, Montreal, QC | 2002 - 2005
