

Marc Berthelette

Senior Azure Infrastructure Consultant | Infrastructure as Code | Cloud Reliability

Smiths Falls, ON, Canada | Remote | marc.berthelette@gmail.com

linkedin.com/in/marc-berthelette-3aba6917 | Bilingual: French (native), English (fluent) | Incorporated in Canada | Available immediately

Professional Summary

Senior Azure and DevOps consultant with 18 years of experience modernizing infrastructure, automating delivery, and improving production reliability. Led Azure modernization and Terraform/Ansible standardization at Energir, built an extensible Python/FastAPI health and governance platform for approximately 250 enterprise Artifactory repositories at Desjardins, and automated operations across a 600-server fleet at Tink. Deep Microsoft Azure, Terraform, CI/CD, observability, incident response, and stakeholder-enablement experience in regulated environments. Works independently, communicates technical risk clearly, and turns ambiguous operational requirements into durable automation and controls.

Core Expertise

Azure Infrastructure	Microsoft Azure, cloud modernization, resilient design, subscription and environment patterns, cost awareness
Infrastructure as Code	Terraform, Ansible, repeatable provisioning, configuration standards, environment consistency
Governance and Security	Zero-trust alignment, configuration-change visibility, vulnerability exposure, auditability, controlled delivery
Reliability and Operations	Root-cause analysis, incident response, MTTR reduction, monitoring, automated remediation, production troubleshooting
Technical Consulting	Independent workstreams, architecture collaboration, proofs of concept, documentation, stakeholder guidance
Programming and Systems	Python, FastAPI, Bash, Linux, Windows Server, VMware, networking fundamentals

Work Experience

Energir - Senior DevOps Engineer

Montreal, QC | September 2021 - Present

- Led modernization of 5-10 mission-critical services on Microsoft Azure and used Terraform and Ansible to standardize dev, staging, and production environments.
- Partnered with Enterprise Architecture to design resilient, cost-conscious infrastructure aligned with cloud-native and zero-trust security principles.
- Standardized CI/CD across nine runtimes and more than 70 applications for 12 teams, replacing fragile manual delivery with reusable pipelines and built-in quality gates.
- Evaluated cloud and infrastructure technologies through proofs of concept, directly informing roadmaps and vendor decisions.
- Drove root-cause analysis and built monitoring, dashboards, and automated remediation to improve production recovery.
- Led adoption through recurring enablement sessions and knowledge transfer across all 12 application teams.

Key technologies: Microsoft Azure, Azure DevOps, GitHub Actions, Terraform, Ansible, Python, Java, Docker, Databricks, CloudFoundry

Desjardins - Senior DevOps Engineer (Contract)

Montreal, QC (Remote) | October 2025 - March 2026 - concurrent engagement delivered alongside the Energir role

- Delivered a six-month financial-services engagement hardening and operationalizing the enterprise JFrog Artifactory platform.

- Built a Python/FastAPI service that validated approximately 250 repositories every four hours and published continuous health signals to Dynatrace.
- Designed the validation engine to be tool-agnostic and configurable, enabling administrator self-service and turning it into the regression-safety net for a platform upgrade.
- Automated on-demand environments with Kubernetes and ArgoCD, and added Splunk alerting for out-of-band configuration changes.

Key technologies: Python, FastAPI, JFrog Artifactory, Kubernetes, ArgoCD, GitHub Actions, Dynatrace, Splunk, Docker, Helm

Tink - DevOps Engineer

Montreal, QC | January 2018 - August 2021

- Automated patching and kernel-update reboots across 600+ servers using Puppet and Spacewalk, reducing the process to a monthly verification check with near-zero downtime.
- Centralized Jenkins Pipeline as Code across 80+ applications for 20+ clients, standardizing delivery across heterogeneous technology stacks.
- Created a fleet-wide internal platform exposing CVE, end-of-life software, and SSL/TLS certificate risks directly to product owners.
- Reduced on-call frequency through root-cause analysis, centralized ELK logging, prevention, and self-healing automation.

Key technologies: Jenkins, Puppet, Python, Bash, Linux, ELK Stack, VMware-adjacent operations, AWS

SOVO Technologies - Lead Technician to Software Engineer

Montreal, QC | November 2008 - December 2017

- Owned company infrastructure across Windows Server, Linux, Active Directory, VMware vSphere, networking, backup, and recovery.
- Implemented a redundant architecture that eliminated single points of failure, including a zero-downtime server relocation.
- Wrote production software for approximately seven years and led technicians while serving as the final quality gate before releases.

Key technologies: C++, Java, SQL, Windows Server, Linux, Active Directory, VMware vSphere, networking, backup and recovery

Education

Bachelor of Automated Manufacturing Engineering - Ecole de Technologie Supérieure (ETS), Montreal, QC | 2005 - 2016

DCS in Computer Science Technology - Cegep Andre-Laurendeau, Montreal, QC | 2002 - 2005
