Professional Summary

Senior DevOps engineer with 18 years across software development, infrastructure, and production operations. Deep Microsoft Azure, Terraform, GitHub Actions, and Azure DevOps experience, with Python and Bash automation throughout. Standardized CI/CD for 12 teams and 70+ applications at Energir and built a Python/FastAPI validation service for approximately 250 enterprise Artifactory repositories at Desjardins. Takes ownership of infrastructure end to end and mentors developers through recurring enablement sessions. Learns unfamiliar platforms quickly by reverse-engineering them before automating.

Core Expertise

Cloud and IaC	Microsoft Azure, Terraform, Ansible, Kubernetes, Docker, ArgoCD
CI/CD	GitHub Actions, Azure DevOps, Jenkins, pipeline-as-code, quality gates
Programming and Scripting	Python, FastAPI, Bash, Java, SQL
Reliability and Observability	Dynatrace, Splunk, ELK Stack, monitoring, alerting, root-cause analysis, automated remediation
Developer Enablement	Recurring training sessions, documentation, platform adoption across teams

Work Experience

Energir - Senior DevOps Engineer

Montreal, QC | September 2021 - Present

- Standardized CI/CD across nine runtimes and more than 70 applications for 12 teams, replacing manual deployments with automated pipelines and built-in quality gates.
- Led migration of 5-10 mission-critical services to Microsoft Azure and used Terraform and Ansible to standardize dev, staging, and production environments.
- Rebuilt Salesforce delivery with no prior experience: official CLI plus a sandbox validation pipeline; missed deployment windows went from a recurring problem to one since launch.
- Drove root-cause analysis on critical incidents and built monitoring, dashboards, and automated remediation to reduce MTTR.
- Ran recurring enablement sessions (about six per year) with each application team after pipeline delivery, turning tooling into actual usage.

Key technologies: Microsoft Azure, Terraform, Ansible, Azure DevOps, GitHub Actions, Python, Docker

Desjardins - Senior DevOps Engineer (Contract)

Montreal, QC (Remote) | October 2025 - March 2026 - concurrent engagement delivered alongside the Energir role

- Built a Python/FastAPI service that validated approximately 250 enterprise JFrog Artifactory repositories every four hours and published results to Dynatrace.
- Made the engine tool-agnostic and configurable so administrators could add their own tests; it served as the regression-safety net for an enterprise JFrog upgrade.
- Automated on-demand environment provisioning with Kubernetes and ArgoCD.
- Added Splunk alerting for configuration changes made outside the pipeline.

Key technologies: Python, FastAPI, Kubernetes, ArgoCD, GitHub Actions, Dynatrace, Splunk

Tink - DevOps Engineer

Montreal, QC | January 2018 - August 2021

- Centralized Jenkins Pipeline as Code across 80+ applications for 20+ clients.
- Automated patching and kernel-update reboots across 600+ servers with Puppet and Spacewalk.

- Built centralized ELK log aggregation and a self-healing response that restarted an unstable Elasticsearch cluster automatically.
- Built the compute, caching, database, and network layers of a client's AWS migration target (EC2, S3, Route 53, VPC), provisioned by hand; the client cancelled before cutover.

Key technologies: Jenkins, Puppet, Spacewalk, ELK Stack, Python, Bash, AWS

SOVO Technologies - Lead Technician to Software Engineer

Montreal, QC | November 2008 - December 2017

- Owned company infrastructure, including a zero-downtime server relocation and redundancy for core servers.
- Wrote production software for about seven years, including a production scheduling system.

Education

Bachelor of Automated Manufacturing Engineering - Ecole de Technologie Supérieure (ETS), Montreal, QC | 2005 - 2016

DCS in Computer Science Technology - Cegep Andre-Laurendeau, Montreal, QC | 2002 - 2005
