

Marc Berthelette

Senior Technology Consultant | Dynatrace | Observability | Platform Reliability

Smiths Falls, ON, Canada | Remote Canada / Montréal | marc.berthelette@gmail.com

linkedin.com/in/marc-berthelette-3aba6917 | Bilingual: French (native), English (fluent) | Available immediately

Professional Summary

Senior DevOps and reliability consultant with 18 years across infrastructure, software delivery, production operations, and stakeholder enablement. Built a Python/FastAPI monitoring service at Desjardins that validated approximately 250 enterprise repositories every four hours and published health signals to Dynatrace. Broad observability experience spanning Dynatrace, Splunk, and ELK, supported by hands-on incident response, root-cause analysis, dashboards, alerting, and automated remediation. Known for learning unfamiliar platforms quickly and helping teams turn technical tooling into adopted operational practices.

Core Expertise

Observability	Dynatrace, Splunk, ELK Stack, dashboards, proactive monitoring, alerting, health signals
Reliability and Operations	Root cause analysis, incident response, MTTR reduction, automated remediation, 24/7 on-call
Consulting and Enablement	Technical workshops, stakeholder communication, documentation, cross-team adoption, bilingual delivery
Platform Automation	Python, FastAPI, Terraform, Ansible, Kubernetes, ArgoCD, Docker, Linux
CI/CD	Azure DevOps, GitHub Actions, Jenkins, pipeline-as-code, quality gates

Work Experience

Energir - Senior DevOps Engineer

Montreal, QC | September 2021 - September 2026

- Standardized CI/CD across nine runtimes for 12 application teams and 70+ applications using Azure DevOps and GitHub Actions with built-in quality gates.
- Drove root-cause analysis on critical production incidents and implemented proactive monitoring, dashboards, and automated remediation to improve reliability and reduce Mean Time to Recovery (MTTR).
- Separated application-code failures from platform-pipeline failures, making results self-diagnosing so teams could immediately identify ownership and next steps.
- Led platform adoption across 12 teams outside any reporting line through recurring enablement sessions and technical documentation after delivery.
- Led cloud modernization for 5-10 mission-critical services on Microsoft Azure and standardized provisioning with Terraform and Ansible.
- Rebuilt Salesforce delivery with an isolated validation pipeline; missed deployment windows fell from a recurring problem to one since launch.

Key technologies: Microsoft Azure, Azure DevOps, GitHub Actions, Terraform, Ansible, Python, Docker, ServiceNow, monitoring and alerting

Desjardins - Senior DevOps Engineer (Contract)

Montreal, QC (Remote) | October 2025 - March 2026 - concurrent engagement delivered alongside the Energir role

- Built a Python/FastAPI service that validated approximately 250 enterprise JFrog Artifactory repositories every four hours and published health signals to Dynatrace.
- Made the validation engine tool-agnostic and configurable so administrators could add their own test cases; it became the regression-safety net for an enterprise Artifactory upgrade.
- Automated on-demand test-environment provisioning with Kubernetes and ArgoCD.
- Added Splunk alerting for configuration changes made outside the delivery pipeline and implemented artifact lifecycle policies.

Key technologies: Dynatrace, Splunk, Python, FastAPI, Kubernetes, ArgoCD, GitHub Actions, JFrog Artifactory

Tink - DevOps Engineer

Montreal, QC | January 2018 - August 2021

- Implemented centralized ELK log aggregation across a fleet of more than 600 servers, improving visibility into production anomalies and incident diagnosis.
- Participated in a 24/7 on-call rotation and reduced repeat incidents through root-cause analysis and prevention; automated recovery of an unstable Elasticsearch cluster so a known failure no longer required human intervention.
- Automated OS patching and kernel-update reboots across more than 600 servers with Puppet and Spacewalk, reducing the process to a monthly verification check.
- Centralized Jenkins Pipeline as Code across 80+ applications for 20+ clients, standardizing delivery and adding release visibility through Jira.
- Conceived and built a fleet-wide software inventory platform exposing CVE risk, end-of-life software, and certificate scoring to product owners.

Key technologies: ELK Stack, PRTG, Jenkins, Puppet, Spacewalk, Bash, Linux, Jira, incident response

SOVO Technologies - Lead Technician to Software Engineer

Montreal, QC | November 2008 - December 2017

- Owned company infrastructure, including a zero-downtime server relocation and redundant core services, while managing and training a team of technicians.
- Wrote production software for approximately seven years and served as the final quality-assurance gate before releases reached production.

Education

Bachelor of Automated Manufacturing Engineering - Ecole de Technologie Superieure (ETS), Montreal, QC | 2005 - 2016

DCS in Computer Science Technology - Cegep Andre-Laurendeau, Montreal, QC | 2002 - 2005
