Professional Summary

Senior DevOps engineer with deep Microsoft Azure, Terraform, Kubernetes, and observability practice in regulated sectors (energy, financial services). Takes ownership of production infrastructure other people are hesitant to touch — learns unfamiliar platforms cold under a delivery deadline, then replaces manual and fragile processes with automation that holds. Led Azure cloud modernization at Énergir across a regulated energy-utility environment, standardizing infrastructure-as-code delivery and eliminating configuration drift.

Core Expertise

Infrastructure & Cloud Automation	Microsoft Azure, Terraform, Ansible, Kubernetes, Docker, ArgoCD
CI/CD & Artifact Management	Azure DevOps, GitHub Actions, Jenkins, JFrog Artifactory, Nexus
Platform Engineering & Enablement	CI/CD standardization across heterogeneous stacks, pipeline-as-code, cross-team enablement without reporting authority
Reliability & Production Engineering	Root cause analysis, MTTR reduction, incident response, automated remediation
Programming & Systems	Python, FastAPI, Bash, PowerShell, C++, Java, SQL, NoSQL, Red Hat Linux, Ubuntu

Work Experience

Énergir — Senior DevOps Engineer

Montréal, QC | September 2021 – Present

- Led cloud modernization migrating 5–10 mission-critical services to Microsoft Azure, implementing Terraform and Ansible IaC practices that standardized environment provisioning and eliminated configuration drift across dev, staging, and production.
- Owned CI/CD standardization for 12 application teams and 70+ applications across nine distinct runtimes, entering most of those ecosystems with no prior experience.
- Drove root cause analysis on critical production incidents and built the proactive monitoring, dashboards, and automated remediation that reduced MTTR across the application estate.

Key technologies: Microsoft Azure, Azure DevOps, GitHub Actions, Terraform, Ansible, Python, IaC

Desjardins — Senior DevOps Engineer (*Contract*)

Montréal, QC (Remote) | October 2025 – March 2026 — *concurrent engagement, delivered alongside the Énergir role*

- Automated provisioning of on-demand Artifactory instances using Kubernetes and ArgoCD, letting administrators spin up fully configured environments for safe testing.
- Delivered a 6-month engagement hardening the enterprise JFrog Artifactory platform, building a Python/FastAPI service that tested the configuration of ~250 remote repositories every 4 hours, publishing to Dynatrace.
- Extended the engagement past its original scope by building the validation logic tool-agnostic and configurable; the same harness later de-risked the platform's own version upgrade.

Key technologies: JFrog Artifactory, Python, FastAPI, Kubernetes, ArgoCD, GitHub Actions, Dynatrace, Docker, Helm

Tink — DevOps Engineer

Montréal, QC | January 2018 – August 2021

- Centralized Jenkins Pipeline as Code across a team of 10–15 developers maintaining 80+ applications for 20+ clients.

- Automated OS-level patching across 600+ servers, fleet configuration driven declaratively through Puppet and Spacewalk.
- Built the compute, caching, and database layers of a client's AWS migration target environment — EC2, S3, Route 53, VPC — with no prior AWS experience; the client cancelled before cutover.

Key technologies: Jenkins, ELK Stack, Bash, Linux, Puppet, Spacewalk, AWS (EC2, S3, Route 53, VPC)

SOVO Technologies — Lead Technician → Software Engineer

Montréal, QC | November 2008 – December 2017

- Owned all company IT infrastructure, including a zero-downtime server relocation and a redundant architecture eliminating single points of failure, while managing a team of technicians.
- Wrote production software alongside infrastructure work for roughly seven years before the title formalized it.

Key technologies: C++, Java, SQL, Windows Server, Linux, Active Directory, VMware vSphere, Cisco routing, firewall/VPN

Education

Bachelor of Automated Manufacturing Engineering — École de Technologie Supérieure (ÉTS), Montréal, QC | 2005 – 2016

DCS in Computer Science Technology — Cégep André-Laurendeau, Montréal, QC | 2002 – 2005
