

Marc Berthelette

Senior Professional Services DevOps Engineer · JFrog Artifactory · CI/CD

Smiths Falls, ON, Canada · Remote · Eastern Time · marc.berthelette@gmail.com

linkedin.com/in/marc-berthelette-3aba6917 · Bilingual: French (native) · English (fluent) · Eligible to work in Canada · Available immediately

Professional Summary

Senior DevOps and platform engineer with 18 years of experience delivering CI/CD, infrastructure automation, observability, and operational improvements for enterprise clients and application teams. Recently completed a six-month Desjardins engagement hardening and operationalizing its JFrog Artifactory platform: built continuous health validation for approximately 250 repositories, automated isolated Artifactory environments with Kubernetes and ArgoCD, strengthened governance with Splunk, and created a regression safety net for an enterprise upgrade. At Énergir, standardized delivery for 12 teams and 70+ applications and led recurring enablement sessions that turned platform tooling into sustained adoption. Brings hands-on JFrog, Jenkins, Docker, Kubernetes, Linux, Azure, AWS, Terraform, Ansible, Puppet, and customer-oriented technical delivery.

Technical Skills

JFrog and Artifact Management	JFrog Artifactory, repository configuration and validation, lifecycle policies, upgrade regression testing, Maven, npm/Node.js, Python, NuGet, Docker, Helm, Debian
CI/CD and Automation	Jenkins Pipeline as Code, GitHub Actions, Azure DevOps, Git, Python, FastAPI, Bash, reusable quality gates
Containers and Deployment	Docker, Kubernetes, ArgoCD, Helm, GitOps, automated test environments
Cloud and Infrastructure	Microsoft Azure, AWS (EC2, S3, Route 53, VPC), Terraform, Ansible, Puppet, Linux, Windows Server
Observability and Governance	Dynatrace, Splunk, ELK Stack, PRTG, configuration-drift detection, audit controls, incident response
Professional Services	Requirements discovery, stakeholder enablement, workshops, technical documentation, architecture evaluation, cross-team delivery

Work Experience

Énergir — Senior DevOps Engineer

Montréal, QC | September 2021 – Present

- Standardized CI/CD across nine runtimes for 12 application teams and 70+ applications, replacing manual delivery with reusable pipelines and built-in quality gates.
- Drove adoption outside any reporting line through documentation and approximately six enablement sessions per year with each application team after pipeline delivery.
- Rebuilt Salesforce delivery with the official CLI and an isolated validation environment that ran the full test suite before promotion, reducing missed deployment windows to one since launch.
- Led Azure modernization for several mission-critical services and implemented Terraform and Ansible practices across development, staging, and production.
- Partnered with application teams and Enterprise Architecture to evaluate technologies, resolve delivery constraints, and design reliable, supportable platform solutions.

Key technologies: Microsoft Azure, Azure DevOps, GitHub Actions, Terraform, Ansible, Python, Java, Node.js, Docker, ELK, ServiceNow

Desjardins — Senior DevOps Engineer (Contract)

Montréal, QC (Remote) | October 2025 – March 2026 — *concurrent engagement alongside the Énergir role*

- Designed and built a Python/FastAPI service that validated the configuration and health of approximately 250 remote JFrog Artifactory repositories every four hours and published technology-specific signals to Dynatrace.

- Extended a repository-configuration request into a configurable, mostly tool-agnostic validation harness that became the regression safety net for the enterprise Artifactory upgrade.
- Automated on-demand Artifactory environments with Kubernetes and ArgoCD, enabling administrators to test upgrades and configuration changes safely in isolated corporate environments.
- Built Splunk alerts for configuration changes made outside approved CI/CD pipelines and implemented artifact lifecycle policies, improving governance, auditability, and storage discipline.
- Supported repositories spanning Docker, Helm, Node.js/npm, Maven, Python, NuGet, and Debian packages, building practical knowledge across enterprise artifact ecosystems.

Key technologies: JFrog Artifactory, Python, FastAPI, Docker, Kubernetes, ArgoCD, Helm, GitHub Actions, Dynatrace, Splunk, Maven, npm, NuGet, Debian

Tink — DevOps Engineer

Montréal, QC | January 2018 – August 2021

- Centralized Jenkins Pipeline as Code for 80+ applications across 20+ clients, standardizing delivery across heterogeneous stacks and adding release visibility through Jira integration.
- Automated operating-system patching and kernel-update reboots across 600+ Linux servers, reducing the process to a monthly verification check with near-zero downtime.
- Built the compute, storage, DNS, networking, caching, and database layers of an AWS migration target using EC2, S3, Route 53, VPC, self-managed caching, and a serverless relational database.
- Conceived and built a software inventory platform for the 600+ server estate, exposing CVE, end-of-life software, application-version, and SSL/TLS risks directly to product owners.
- Built a self-healing response for an unstable Elasticsearch cluster so monitoring automatically remediated a recurring production failure.

Key technologies: Jenkins, Git, Linux, Bash, Puppet, AWS, EC2, S3, Route 53, VPC, ELK Stack, PRTG, Jira

SOVO Technologies — Lead Technician to Software Engineer

Montréal, QC | November 2008 – December 2017

- Owned infrastructure and customer-facing technical operations, delivered a zero-downtime server relocation, introduced redundancy, and managed and trained technicians.
- Designed and wrote production software for approximately seven years, including a scheduling platform, voice-recognition evaluation software, and multilingual dictionary infrastructure.

Key technologies: C++, Java, SQL, NoSQL, Linux, Windows Server, Active Directory, VMware vSphere, networking

Education

Bachelor of Automated Manufacturing Engineering — École de Technologie Supérieure, Montréal, QC | 2005 – 2016

DCS in Computer Science Technology — Cégep André-Laurendeau, Montréal, QC | 2002 – 2005
