Professional Summary

Senior DevOps engineer with 18 years building and operating cloud infrastructure, including a from-scratch AWS build at Tink (EC2, S3, Route 53, VPC, self-managed memcached, serverless database) delivered with no prior AWS experience. Current Terraform, Kubernetes, and Python/FastAPI practice at Énergir and Desjardins, standardizing infrastructure and building internal services for real operational audiences. Comfortable operating with autonomy and shipping working infrastructure under a delivery deadline.

Technical Skills

Cloud Infrastructure	AWS (EC2, S3, Route 53, VPC — hands-on build, see Work Experience), Microsoft Azure
Containers & Orchestration	Kubernetes, Docker, ArgoCD
Infrastructure as Code	Terraform, Ansible
Programming	Python, FastAPI, Bash, Java
Observability	Dynatrace, Splunk, ELK Stack
CI/CD	GitHub Actions, Azure DevOps

Work Experience

Énergir — Senior DevOps Engineer

Montréal, QC | September 2021 – Present

- Led cloud modernization migrating several mission-critical services to Microsoft Azure, implementing Terraform and Ansible IaC practices that standardized environment provisioning and eliminated configuration drift across dev, staging, and production.
- Drove CI/CD and platform-engineering adoption across 12 application teams outside any reporting line, running recurring enablement sessions (~6/year) that turned delivered tooling into actual usage.
- Standardized CI/CD delivery across nine distinct runtimes for 12 application teams and 70+ applications, entering most ecosystems with no prior experience and reverse-engineering each before automating it.

Key technologies: Microsoft Azure, Terraform, Ansible, Azure DevOps, GitHub Actions, Python, IaC

Desjardins — Senior DevOps Engineer (Contract)

Montréal, QC (Remote) | October 2025 – March 2026 — *concurrent engagement alongside the Énergir role*

- Automated provisioning of on-demand Artifactory environments using Kubernetes and ArgoCD, giving administrators repeatable, isolated environments for safely testing configuration changes and upgrades — internal developer tooling built for a real audience.
- Extended the engagement past its original scope by building the validation logic tool-agnostic and the test set configurable, so administrators could cover their own cases.
- Designed and built a Python/FastAPI service that tested the configuration of ~250 enterprise Artifactory repositories every 4 hours.

Key technologies: Kubernetes, ArgoCD, Python, FastAPI, GitHub Actions, Docker, Helm

Tink — DevOps Engineer

Montréal, QC | January 2018 – August 2021

- Built the compute, caching, and database layers of a client's full AWS migration target environment — EC2, S3, Route 53, self-managed memcached on EC2, and a serverless relational database — and contributed to VPC/network and Route 53 design, with no prior AWS experience. Roughly 6 months of work; provisioned by hand in the AWS console, not through Terraform or CloudFormation; the client cancelled the migration before cutover.

- Centralized Jenkins Pipeline as Code across a team of 10–15 developers maintaining 80+ applications for 20+ clients.
- Conceived and built, unprompted, a software inventory platform cataloguing every application and version across a 600+ server fleet — surfacing CVE exposure, end-of-life software, and SSL/TLS certificate scoring to product owners who previously had no such visibility.
- Managed fleet configuration as code via Puppet and Spacewalk.

Key technologies: AWS (EC2, S3, Route 53, VPC), Jenkins, Puppet, Spacewalk, Bash

SOVO Technologies — Lead Technician to Software Engineer

Montréal, QC | November 2008 – December 2017

- Owned company IT infrastructure, delivered a zero-downtime server relocation, and introduced redundancy that eliminated single points of failure.
- Wrote production software for approximately seven years before the title formalized it.

Key technologies: C++, Java, SQL, Windows Server, VMware vSphere, Active Directory

Education

Bachelor of Automated Manufacturing Engineering — École de Technologie Supérieure, Montréal, QC | 2005 – 2016

DCS in Computer Science Technology — Cégep André-Laurendeau, Montréal, QC | 2002 – 2005
